

PHOENIX WELDING

Premier Fabrication and Field Services

About Us:

Phoenix Welding has been incorporated since 1985 and our key personnel and management team have been in the mechanical trades since the early 1980's. We are proud to be a full service ASME Industrial Mechanical Contracting Company. Our primary business is industrial and process piping and tank repairs for a variety of industries including but not limited to: petroleum distribution, power generating industries, pulp & paper manufacturing as well as chemical and pharmaceutical firms. As a company, we have over 35 years of experience and history of quality work. We look forward to helping you with your next project!

Skid Fabrication

At Phoenix Welding, we fabricate skid packages to any specifications required.

Our quality control program ensures strict compliance to ASME or local code requirements, ensuring the highest quality product..

We also provide field delivery and installation of skid packages along with complete project installations.

We can custom build one skid or build skids for a system-wide upgrade. Our experienced, certified fabrication crews offer value engineering to maximize your project efficiency.
